

OnlyPlants

Designed on the usage of a virtual garden to track the real one in your house

Where you can search a vast variety of plants

Create your own garden, keeping track with your plants and share it with other people

Personas and interest

Some things that users want..

"A virtual garden could be useful, where I can see what plants I have"

"A place where I can search info about my plants"

"I want to be able to share my garden and see other ones, so I can comment them"

Persona 1

22-year-old student that doesn't have all the time, but wants to have green in her life

Persona 2

20-year-old student who has interest in creating a own garden

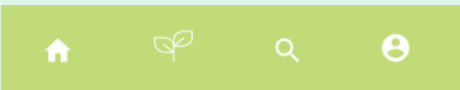

Persona 3

45-year-old worker who doesn't spend a lot of time in home, but wants to take care of some plants

Creating the pad

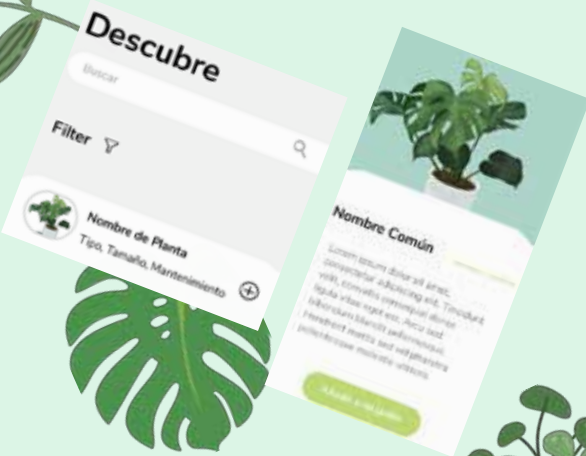

Designed a bar to the access to a home page, own garden, search of plants and profile. Simple and easy to learn

Keeping track of your plants, as a virtual garden, with the times the user puts to remember when to take care

Search a lot of types of plants, with interesting info about them, and adding them to your garden

Creating the pad
